

“This year (2017) I have spent 8 months attending intensive German courses in Germany. Horizonte was the first school and by far the best. Even though I was in the lowest level (A1.1), my teacher was able to explain everything in German. All of the teachers in the school seem to be very experienced with teaching. You can tell because they know exactly where the students might have difficulties and always provide clear explanation using simple language. The other special thing about the school is that we are encouraged to always communicate in German. There are many opportunities to talk to the teachers and other students during school activities and class breaks. So during the 6 weeks my German has improved significantly because I had to use the language outside class every day. In the other schools I attended, nobody speaks German outside class time unless they have to. I find this very strange because how can we learn a language without actually using it? Overall I would definitely recommend the school mainly because of the quality of teachers and the emphasis on speaking. It may not be the cheapest option but after attending so many schools in Germany, I can say it's worth the money and you can clearly see the difference.” (Yi Ding, Australia)
